

Measured hardware · KV versus RR

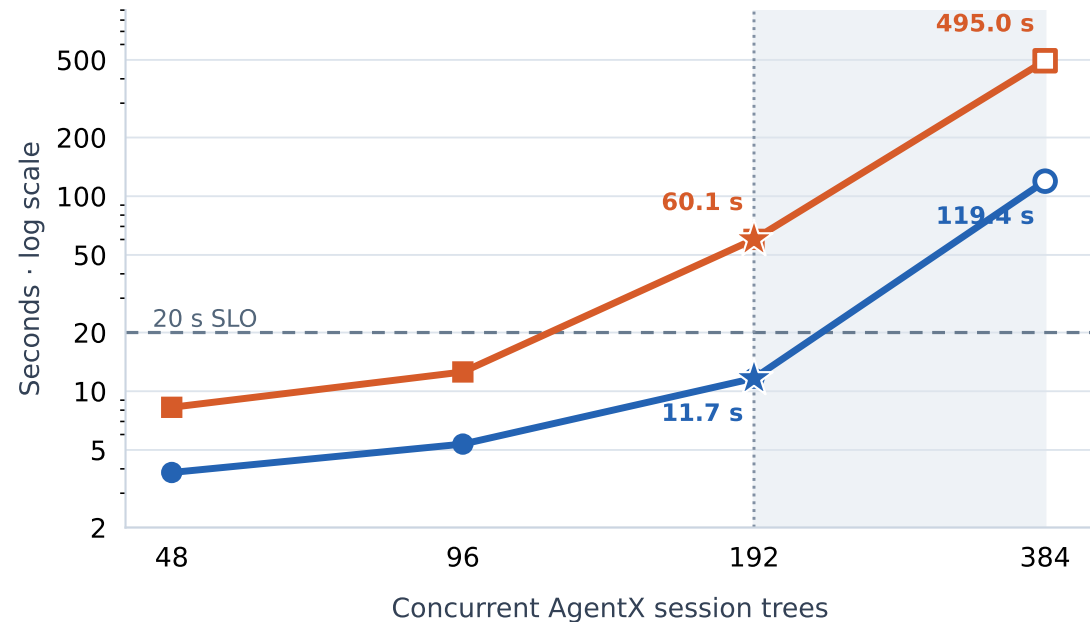

N3U · 24 GB300 GPUs · 6 × TP4/EP4 · AgentX · one-hour profiles

—●— KV —■— RR

Throughput

P95 time to first token

★ 192 = highest-throughput sampled point for both policies; RR already flattens over 96–192.

Shading: KV transition over 192–384. Hollow markers: saturated runs. Intermediate points were not measured.
