

Real KV-router flag sweep · 192 AgentX clients

24 GB300 GPUs · 6 × TP4/EP4 · three tested variants, with default KV and RR references

Throughput · higher is better

P95 TTFT · lower is better

Best measured: scale 3, credit 0.8, temperature 0, FCFS. Versus default KV: +14.1% throughput, −45.7% p95 TTFT.

One run per setting. The same variant was also tested at 96 clients; its knee has not been measured.
